This range of high-performance glass allows optimum light to pass through whilst reflecting a large amount of heat.

GLASS GAINS

Vikram Khanna,
Chief Operating Officer,
Architectural Institutional
Business, Asahi India Glass

New state-of-the-art glazing technologies for lamination and processing have brought in new types of energy efficient glass for both exterior and interior applications. As a result, the following trends are emerging: improved thermal

insulation
glazing, double-
layer facades,
facade
retrofitting,
smart glazing,
light shelves,
integration of

photo-voltaics and innovative
structural use of glass
